SCREW BASKET -NOW A REALITY IN THE Nebuloses Range

The new characteristic color of the Screwbasket is another sign of the "red thread" introduced by the company.

The Basket has an adapter available in both 8mm and 10mm (sitting on all new rods from Vasa and upwards). You choose from Race, Medium and Snow Basket.

In addition, there is a roller basket.

The full range is complete in the stores from spring 2018, which means maximum flexibility!

Everything in the classic color Helium Blue!

157 SKI TEAM -

SKIGO partner and sole waxes supplier

Skigo has in recent years developed its fields to the absolute highest level. Skigo and Christer Majbäck's development and testing work is solid and we know that we get the absolute best courses under the skis. That's something we're in 157 Ski Team really puts a high value on.

Another thing we really appreciate with the cooperation is the proximity of Skigo's development work. We feel we are developing and developing the fields to make the waxes even better.

The beginning of the season has really shown us that Skigo is on the right track with its new series and it feels really safe to bring in during the winter.

Anton Järnberg, Sports Manager Stock 157 Ski Team

NEBULOSES RANGE -

premiere at the Olympic Games.

Some parts completely new constructed.

To the 17/18 season we will launch a whole new range! Both design and some construction have evolved and the rods have got a whole new meaning in modern skiing!

You can find the rank on our website, where you can read more about the respective rods. Some models of the more expensive have got new fibers of carbon fibers, and someone has been strengthened! All work was done to find an optimized pendulum, low weight and a relevant rigidity!

We feel we managed well, and the rank is also marketable in the tracks. The new screwbasket has finally finished (3 different to choose from) and of course we have our extremely popular" BOA" strap in the handle. The new 1.0 will be a "bomber"

ENVIRONMENTAL

We are heading for a future with more and more restrictions on Fluor in the fields and it is not possible to make a day of manufacture without Christer and his men being faced with questions in new molecular chains and mixtures.

We are on track and are very well ahead and when the authorities say it is time to start the settlement, SKIGO is one of the best-equipped companies.

Today we have materials around the world at selected teams and people to test so that the material works in all snow types!

We are safe in this phase at work and look forward with confidence.

"There are more challenges than this in development, but I keep it for myself so long," says Christer Majbäck.

NEWS

Kiruna January 2018

Newsletter #1-2018 page 2(2)

Now we release "LIQUID PARAFFIN"

Which will be unique in their group! The wear and tear we can offer on these liquid paraffins is unique! In addition, we have done it very easily with Warm / Cold and Universal in both XC, LF and HF. The test job has been done now for 1.5 years and now we "release" the products to you so you can test yourself. Already in stock!

SKIGO - Leading supplier of roller skis.

Skigo AB has signed a new 4 year contract with ALLIANSLOP-PET and will be the official supplier to the elite skiers. A job that commits and requires good products and good organization. Several news The Alliance race will be presented and many will understand that SKIGO is entering a new era!

At the same time, we will be an important player with the material for KLARÄLVSLOPPET as in the previous year. Here too, SKIGO will be involved in developing and shaping many news that will attract new participants - maybe a real "folk race" as it seems today.

PRO(ENTER

A bet that really went home!

Many people learn that SKIGO belongs to one of the major players in the WC, Long distance VISMA, national team and team, worldwide as a supplier at Valla and accessories. To a certain extent, a range of special products. Many products have been around for a while - but now they are available from the 17/18 winter in all PRO CENTER. You can tell SKIGO's specialist stores!

Now, SKIGO will take this to other countries and take special attention to stores like this with CrossCountry around Europe! In addition to this, the new range of poles with very nice look and new thinking in construction now comes!

Powder Iron and MIRACEL - Scraper

The season 17/18 is planned and we make sure accessories are happening to the next season. A new Powder iron with "thick sole" will come into the assortment. This will complement our range of products that have been selling successes so many seasons! The new one is expected to cost about; 220 EUR in store!

A miracle scraper in 5mm polished acrylic with diamond grinding in Microscopic diagonal!

A slip method that turns out to change wear resistance on many different tools. NOW ON SKIGO!

VASALOPPET 2018

The effort on Vasa-week has never been so important to us as this year. Together with the Lager 157 Ski Team, we will run a service in both Mora and Sälen to wax skis to those who want the same quality as the team has during their racing skis. A lot of multicolored ski figures will be in the scenes to ensure that the customer gets the best possible and a nice trip to Mora.

Much else will be found at Mora and Sälen service centers, when several of 157 stock sponsors entertain themselves with coffee. "White Room" will be built up.
